

FlowRider® Edge

Turn your backyard into your own private wave riding paradise!

The FlowRider Edge is a truly unique product and is designed specifically for the backyard. This system operates by connecting a FlowRider to the edge of a swimming pool where it shares the same body of water and filtration system. The tank is designed so it can integrate into your existing pool which in turn reduces site works. This allows you, your friends and family to surf your own perfect stationary wave at the push of a button. The patented inflatable ride surface technology allows the participant to ride safely and when a wipeout occurs, they simply flow over the hump and land in the pool behind the wave.

Ride Experience

Within a single attraction your guests can experience so much:

- Thrill of surfing without the intense ocean experience
- Fun wipeouts straight off the back and into a swimming pool
- Option to stand up ride or ride prone with a bodyboard
- Three experiences in one - skill-based surfing followed by weightlessness and ending with a big splash!

Features

- Super safe, patented inflatable ride surface & side wall technology
- Connects to your swimming pool
- Brings surfing and excitement to your swimming pool
- Can be deflated and hidden with decking

Benefits

- Reduced site and set up costs
- Simple gunite pool shell
- Creates sponsorship opportunities
- No need for additional filtration
- Fun and interactive activities, right in your backyard
